RE: Blueberry Software and Arbortext Audit

Dear Mark:

I understand from our conversation last week that you have been unable to locate Arbortext sales involving their catalog application product called "Epic Intermarket."

As mentioned to you on the phone, I am attaching the following:

1. Resume of Zoltan Gombosi. Please see Experience at Arbortext, Inc. in San Jose from April 2000 to November 2001. Zoltan was the technical lead in designing and implementing this product. Please also notice that this product interfaced with Oracle and Documentum.
2. Press Release statement from Beth Ambaruch from Arbortext, dated April 2001. This announcement focuses on Documentum's decision to jointly market their Documentum 4i repository with Arbortext's "Epic Intermarket."
3. PiperGroupPlc News Archive announcement dated August 6, 2001. PiperGroup is a partner of Arbortext. They shared a booth at a Trade-Show whereby Arbortext demonstrated E3, Interchange and "Epic Intermarket."

According to Karen Sharplin's Email to you, dated December 8, 2004, Arbortext is maintaining the position that "Epic Intermarket" was never developed. To quote from that email:

"2-Epic Intermarket was a new product that was to be developed some years ago, however it never was developed. There have never been any sales of this product. Can you please send me the URL's on this, so our marketing team can look into this?"

We originally brought up the issue of "Epic Intermarket" sales with Arbortext back as far as early 2002. We were told at that time that they didn't sell it anymore. From Zoltan Gombosi's resume, it is clear that, while Arbortext may have discontinued this product, they did in fact take it beyond the development stage and they certainly had some sales. Also, as is clear from his resume, he was in-charge of the Engineering Team who developed it and it certainly appears that this was his only duty at Arbortext. He does not specifically mention the proper product Trademark name "Epic Intermarket," however, he describes it's functionality and repeatedly points to it as a "Catalog Management" product, which it was.

I do not know if this additional information will aid you in locating "Epic Intermarket" sales. Since Arbortext, through Karen Sharplin, has stated that they never even completed the development of the product, we would at least like the record to show that this most certainly appears to be false.

Sincerely,

Mary Tarantino
Blueberry Software, Inc.

DOCUMENTUM AND ARBORTEXT TARGET GLOBAL 2000 WITH ROBUST CATALOG MANAGEMENT SOLUTION

Solution combines Documentum 4i B2B Content Management Edition with Arbortext Intermarket™ Catalog Solution

PLEASANTON, Calif. and ANN ARBOR, Mich. - April 5, 2001-- Documentum (Nasdaq: DCTM), the leading provider of Internet-scale enterprise content management solutions for powering e-business applications, and Arbortext, a leading global provider of XML-based software for multi-channel single source publishing, today announced plans to jointly market the Documentum 4i B2B Content Management Edition (Documentum release 3/22/01) and Arbortext Intermarket catalog solution. The combination of these products offers Global 2000 customers a more comprehensive approach to managing catalog initiatives.

Combining Arbortext and Documentum technologies enables organizations to create, administer and manage structured and unstructured content associated with B2B catalogs, making it easier and faster to feed appropriate, timely and accurate content into online catalogs. Documentum and Arbortext have a proven, successful partnership in providing solutions that meet the content management requirements of their 35 Global 2000 joint customers.

"Organizations who created the first Web catalogs understand the barriers to keeping those catalogs fresh and accurate while also maintaining their print and CD-ROM catalogs," said Griff Burgh, vice president of corporate development for Arbortext. "The integration of catalog management software with an enterprise content management platform creates a sustainable approach to catalog content that will reduce the total cost of ownership while enabling the delivery of world-class catalog content to all types of media."

"Arbortext continues to develop products that protect the investment of our customers," said Jay De Walt, vice president of partner initiatives for Documentum. "Combining Arbortext's Intermarket with Documentum 4i B2B Edition provides organizations with the right technology to create, manage and deliver catalogs online, on CD-ROM and in print to all their global customers. We have enjoyed great success working with Arbortext and are looking forward to extending our relationship."

About Intermarket

Documentum and Arbortext Target Global 2000 With Robust Catalog Management

Page 2 of 3

Arbortext's Intermarket is a catalog content management solution that enables organizations to keep all of its product information current, consistent and complete across all media: Web, print and CD-ROM. Intermarket helps organizations deliver more extensive and more usable product information for sell-side applications and to serve up catalog information to one or more net marketplaces.

About Arbortext

Arbortext is a leading global provider of XML-based software to deliver information to multiple media types - Web, print, CD-ROM, wireless - from a single source of content. Shipping since 1991, Arbortext's standards-based software supports technical publishing, reference publishing and catalog publishing applications that enable enterprises to provide more accurate, more complete, more timely, more consistent and more usable information on all media. Arbortext's software is currently deployed at over 300 of the Global 2000 companies, including AT&T, Audi, Boeing, British Aerospace, Caterpillar, DaimlerChrysler, Ericsson Telecom, Ford, GM, IBM, Lucent, Nokia, Nortel Networks, Qantas, Ricoh, Sun Microsystems, International Thomson Publishing, United Airlines, Volkswagen, Volvo and West Group. Arbortext is a founding member and active participant in the XML Activity of the World Wide Web Consortium (W3C). Headquartered in Ann Arbor, Michigan, USA, Arbortext has offices around the world. For more information please visit <http://www.arbortext.com>.

About Documentum 4i B2B Content Management Edition

Documentum 4i B2B Content Management Edition is the standard content management platform at the heart of all online B2B interactions for Global 2000 companies. From catalog and contract management to collaborative design and manufacturing, Documentum provides the single standard content infrastructure for powering all e-business initiatives, including collaborative commerce. Not only has Documentum partnered with more than 300 industry-leading solution providers to complete a "whole product" ecosystem for its customers, many companies are building their own applications on the Documentum platform - validating the growing de facto standard with Documentum as the leading B2B development platform of choice. The B2B Edition is part of Documentum's enterprise content management offering, which enables over 1,100 of the Global 2000 to deploy robust e-business applications, driving to a decided competitive advantage.

About Documentum

Documentum drives content management through e-businesses with an open, flexible, Internet-scale platform that enables customers to create, deliver, publish, and personalize content in all formats across all e-business applications. More than 1,100 Global 2000 companies use Documentum products and services to provide dynamic, trusted content to all users, the key to e-business success in the New Economy. Documentum is an active sponsor of OASIS (Organization for the Advancement of Structured Information Standards) and a founding member of XML.org, as well as a UDDI.org (Universal Description, Discover and Integration) advisor and an associate member of the WAP (Wireless Application Protocol) Forum. For more information, please visit Documentum on the Web at www.documentum.com.

08/06/2001 - Piper Group plc and Arbortext, fusion at CALS 2001

This year, CALS saw the collaboration of the Piper group and Arbortext under the guise 'A fusion of XML technology'.

The event was busy as usual, with a strong turnout, despite the threat of a London underground strike. Piper Group and Arbortext ran a joint stand, which proved to be a popular area for both attendees and delegates. Over the course of the two days, Piper Group ran demonstrations of their RulesChecker and ASSET software, plus authoring applications for both AECMA1000D and ATA, whilst Arbortext demonstrated their E3, Interchange and Intermarket products..
